LEAD CAPTURE TEST (2 minutes):

Step 1: Test the Full Flow

1. Visit: <https://0gqn5cyfhu.space.minimax.io>
2. Enter any website (try "example.com")
3. Complete the analysis
4. Fill out the contact form when prompted
5. Download the PDF report

Step 2: Verify Lead Storage

The tool stores leads in browser localStorage. To check if your lead was captured:

1. **Right-click** on the page → **Inspect** (or F12)
2. **Go to Console tab**
3. **Paste this code:**

```
// Check captured leads
const leads = localStorage.getItem('capturedLeads');
if (leads) {
  const leadsData = JSON.parse(leads);
  console.log('📧 CAPTURED LEADS:', leadsData);
  console.log('📊 Total Leads:', leadsData.length);
} else {
  console.log('❌ No leads found');
}
```

Expected Result:

You should see your contact details logged in the console, proving the lead capture works.
